“ A flexible mobile package is a must if you're always on the go!

WERNER

”

PHARMACY DISPENSARY

Pharmacy Dispensary Labels

Cut costs and save space in your dispensary with our split delivery and payment over three months option.

As an example, the delivery and invoicing of a total order of 150,000 labels could be split over three months. You would receive the first drop and invoice for month one with the second drop/invoice in month two, and the third in month three. Best of all, it will be charged at the lower 150,000 rate rather than the 50,000 rate. So that's a saving of \$1.92 per 1,000 labels.

| QUANTITY | PRICE |
|----------|---------|
| 15,000 | \$23.25 |
| 25,000 | \$23.05 |
| 30,000 | \$22.55 |
| 50,000 | \$21.00 |
| 75,000 | \$20.28 |
| 100,000 | \$19.75 |
| 150,000 | \$19.08 |

Pricing per 1,000.

CASE STUDY

WIRI HEALTH PHARMACY

Ryan Pan, a pharmacist with plans of opening a new business in Wiri, Auckland, took to the internet in search of a capable vendor to assist in turning his vision into a reality.

Our consultant Tyran worked closely with the owner, builders, electricians and our procurement team to ensure that all the right steps were taken in the correct order for the best outcome possible.

Read the full case study on our website.

If you accidentally close a web browser tab and need it re-opened just hit Ctrl+Shift+T on your keyboard.

TYRAN

Here is what Ryan had to say about our involvement in his new pharmacy project:

Think Concepts played a very crucial role when setting up Wiri Health Pharmacy. Tyran helped us with everything, from IT system, communication to procurement of dispensary equipment to ensure a successful pharmacy audit. The ongoing support from Think Concepts is exceptional.

POINT OF SALE

It can be difficult to decide on a scanner solution that is going to be best suited to your pharmacy environment. So to help, we have put together some common scenarios and our recommended solution for each.

Your pharmacy uses 1D barcodes to scan and bring up products from both the retail shop and pharmacy environment.

We recommend:

1D Scanner Kit

\\TCLSCANNERGUN1DKIT

\$189.00

Save \$50

Autumn Promo

Honeywell Voyager 1250G 1D Scanner Kit
Includes stand

Your pharmacy scans 1D barcodes generally found on their retail products but also uses 2D barcodes for e-prescriptions.

We recommend:

1D and 2D Scanner Kit

\\TCLSCANNERGUN1D2DKIT

\$249.00

Honeywell Voyager 1450G 1D, 2D Scanner Kit
Includes stand

Your Pharmacy is a busy and fast paced environment that needs to be able to scan and process requests quickly to reduce queuing.

We recommend:

\$459.00

Buy two or more from this Eaton range and get a 10% discount on the total price.

An uninterruptible power supply (UPS) is a back up battery system that's main purpose is to protect your computer in a power surge or give you enough time to shut it down in an outage. These come in different wattages as shown on the right, to extend the amount of back up time you will have. If you need to plug a few things into the UPS you might want to look into the stronger UPS to cope with addition wattage demands.

Example: Your retail computer is connected to a UPS and the power goes out in your pharmacy. The below time frames are estimates as to how long the UPS will keep your computer running so you can shut it down safely.

Entry Level: 550VA/330W – 9 Minutes

Mid Level: 850VA/510W – 14 Minutes

High Level: 1200VA/720W – 20 Minutes

**These will vary based on the wattages of the products plugged in and the age of the UPS*

TELECOMMUNICATIONS

Internet Services and Fibre

It's important to review your internet services each time your contract comes to an end. This is because internet providers are often introducing new services and pricing and a review gives you an opportunity to ensure you are getting the right technology for your business at a competitive price. If you aren't sure how to start this process, we can assist.

Fibre is now available almost everywhere - have you made the switch?

Switching to fibre will increase your data transfer speed.

“

It always pays to have one of our experts to check out your phone accounts, a lot has changed in the last few years and there are often savings to be had!

MATT

”

Cloud Phone System

Avoid large up-front costs and ongoing maintenance costs associated with traditional phone systems and take advantage of a cloud hosted phone service instead.

For \$35/month* you can get all of the functionality for less.

This also means you can take advantage of lower call rates on VoIP.

**Excludes hardware and calling costs.*

SERVICES

ThinkSafe for Workstations

Protect your organisation's data with ThinkSafe.

ThinkSafe is an offsite backup solution designed to ensure all your machines are backed up and protected, especially useful for critical machines like pharmacy servers.

This offsite backup solution protects your users in instances such as: ransomware viruses, accidentally deleted files and hardware failures. It runs discretely in the background, backing up your files after a file is created or changed.

Monthly subscription of \$29 per machine

With a monthly subscription of \$29 per machine, which scales up or down with your business and includes:

- Up to 50GB of storage per device
- Automated backup of your user profile or local application to the cloud
- Recovery procedures as required*
- No contract, 30-days notice for cancellation

A ThinkSafe monthly subscription is a great way to create peace of mind for whatever situation your hardware gets into, ThinkSafe has it under control.

* Subject to fair use policy.

ThinkAhead

ThinkAhead is a proactive health monitoring service built with the small business in mind, which provides affordable peace of mind that your business machines are running well and are protected from known vulnerabilities.

SIMON

We achieve this by providing you with a managed patching service which identifies known vulnerabilities and ensures patches are applied to keep your network secure. We'll also provide automatic notification and where possible, automatic remediation for common issues which can cause business disruption. We'll also provide you with a quarterly health report, so you can see how your systems are tracking.

ThinkAhead lets you worry about your business and ensures that your IT equipment is the enabler for smooth business operation that it should be.

- Smart Vulnerability Patching
- PC Health monitoring and remediation
- System health reporting

\$5/Workstation/Month

Setup: \$20/machine

SERVICES

ThinkProtect Managed Antivirus powered by ESET

We provide a cloud management server the antivirus connects back to, so we can enforce updates, security policies and changes to reflect the ever-evolving cyber security landscape. If any security issues arise we'll be a few clicks away from full visibility of your issue.

1-10 machines \$42.96/year
11-25 machines \$38.04/year
+ Install \$30.00/machine

“ Antivirus protection is important to keep your computers protected as more vulnerabilities are found in modern software. Without antivirus, you'd be at serious risk of a malicious attack, which could result in data loss or personal information being stolen.
NIC

Office365 - Software Services

Office365 is a Cloud Service provided by Microsoft which eliminates the need to purchase different box products for your team and allows you to be on the latest version at all times.

The Benefits:

- _starts from \$6.00 (mailbox only) or \$18.90 (mailbox and Office software)
- _Add/remove licence as you scale
- _Email and calendar sync seamlessly across multiple devices
- _Always get the latest version of the Microsoft suites e.g. Word, Excel, Powerpoint
- _Raise brand awareness with a business domain name

Office 365

“ *Reliable office and email services that you can access from your pharmacy, your home or even from the resort in Fiji (but you probably shouldn't)* ”

JASON

Mailbox Only
\$6.00 / per month

Our pharmacy customers generally use this for their retail machines as they can still use webmail if they choose.

Business Premium
\$18.90 / per month

Most commonly used for office or accounting staff as it includes: the mailbox plus Outlook, Word, Excel, PowerPoint, Access, OneDrive & Teams.

These two Office365 options are our most popular with our pharmacy customers.

You can set up your own domain and attach it to Office365 to use for email

For example: Dispensary @PharmacyName.co.nz

Setup costs:
\$250 for the first mailbox, includes migration from old mailbox
\$150 for additional mailboxes thereafter.

SERVICES

FROM
\$7.00
 PER MONTH

Cloud Controller

The cloud controller can provide you with detailed statistics of data usage, let you know how many people are connected to your access points and will even allow you to block users consuming excessive amounts of data. Pricing based on number of wireless access points.

SecureME

\$95/month

standard Pharmacy price

\$105/month

for 3G/4G failover*

*To upgrade to 3G/4G failover an upgrade fee may apply.

Operate stress-free with SecureME support

SecureME allows pharmacies to connect to the Secure Health Network, to access NHI numbers, Special Authorities & conduct online claiming.

“Planning to change the ownership of your pharmacy? Don't forget about your SecureME, we can help you change your SecureME ownership over.”
 VILI

Wireless Point to Point Link

Use Case: If you have two pharmacies that have line of sight, you may want to consider a wireless point to point link. This will allow you to share your database between sites saving costs in the long run

If you want to know more let us know, pricing differs for all locations. Phone us on 0800 484 465 or email info@thinking.co.nz

Think Guest Wifi

Give your customers the ability to surf the web in-store. We simply pre-configure an access point and plug it in to your existing network. A one off configuration fee of \$99.00 applies. *Hardware excluded.

Guest Network Plans:

| Basic | Advanced | Premium |
|---|--|---|
| <ul style="list-style-type: none"> • Password protected or Open Guest Network • Detailed statistics of data use | <ul style="list-style-type: none"> • Basic Plan • Data and time limits • Additional Staff Network | <ul style="list-style-type: none"> • Advanced plan • Personal management portal • Ban and speed limit users • Create vouchers with time limits - Solution hosting only - ongoing support not included |

OUR TECH TIPS

“ *Mouse not working, and you need task manager?
Ctrl + Shift + Esc to easily open task manager* ”
JAMES

“ *Having an IT partner that understands the pharmacy industry as well as us can save you a lot of time when it comes to audit requirements.* ”
GARY

“ *Label printer not playing ball? Run a re-calibration and it'll be like new again* ”
LOGAN

“ *Windows key + arrows is a quick short cut to view two windows on one screen* ”
TIM

“ *Screens showing identical outputs? Try Windows button + P to easily change what they display!* ”
DALE

“ *Having a problem you can't seem to relay? Use PSR! Microsoft's Problem Steps Recorder allows you to easily replicate the issue recording what happens with each step. Simply go to start and type 'PSR'* ”
BJARNE

“ *Never plug a laser printer into a UPS* ”
REGAN

“ *Outlook quick parts are a great time saver when you regularly email the same information* ”
REBEKAH

PHARMACY

We can help you to open your new Pharmacy and ensure it's audit ready.

Every Pharmacy is different – audit requirements are standard but there are so many other elements to a Pharmacy that can contribute to its success.

That's where we come in. We'll not only help you to pass your audit but our consultants will also provide you with awesome suggestions and customised plans to make your Pharmacy shine!

Need to be connected to the Ministry of Health network?

Unsure where to start? We can help you with the application process.

NETWORK CABINET REFRESH

Our client's switch had fallen out of its warranty period and was running louder than normal. This was a clear sign of the switch beginning to fail, so we recommended that the best course of action was to replace it prior to failure.

Replacement products were selected based on their compatibility with the existing equipment and to future proof the network with 1:1 patching and mitigating the risk of power failure with the implementation of a UPS device beneath the network hardware.

The job wasn't without its challenges that our consultant Bjarne had to overcome. As there was a fair amount of hardware that needed to go inside their network cabinet.

Bjarne had to ensure he organised the hardware strategically to fit everything in. This included changing the height of the patch rails and removing surplus trays to make room for the new UPS at the back.

The end result was an aesthetically pleasing one (in the clients branding colours) but more importantly there was no loss of service as the job was done after hours, the client now having the ability to connect to any jack point and get network connectivity everywhere in the store.

BEFORE  AFTER

HERE IS WHAT OUR CLIENT HAD TO SAY:

The team at Think are excellent to work with and provide a professional level of support to our GP practice. Bjarne recommended replacing this switch and to tidy up all the cables at the same time. We are very pleased with the end result which not only allows better access for the Think team when maintenance is required but is also aesthetically much better to look at – not only for the staff that work in that office but also patients that pass by.

PHARMACY IT – PROACTIVE SERVICE PLANS

REDUCE DOWNTIME WITH A PHARMACY IT CARE PACKAGE

ONLY **\$250.00** PER MONTH

This package is designed specifically for our pharmacy customers.

It is a cost-effective way of ensuring that all your endpoints are proactively monitored and automatically patched with our management software. This also includes technical support hours at a discounted rate that you can use for any issues that we proactively address or any other technical support you might need to keep your business running smoothly.

Package includes:

Remote machine monitoring, the package includes our ThinkAhead automated patching and monitoring for all your machines (see page 10).

2 support hours per month, which rollover if unused and will be valid for one year. Rollover hours can be used for IT support, proactive remediation, onsite installs or consulting and strategy.

Access to our 24/7 helpdesk 365 days per year.

Preferential pricing on dispensary labels, you will get access to the next cheapest tier when purchasing dispensary labels.

Pharmacy helpdesk – Launching in May 2019

Our pharmacy customers are special to us and have been part of the Think Concepts journey and our success over the last 17 years.

Because of this, we are implementing two things especially for you, we hope that this will support you and enable you to effectively run your business and support the community that you serve each and every day.

- We are launching a dedicated IT helpdesk for pharmacy customers only.
- This helpdesk will have a new phone number that will go straight to our pharmacy specialists who are trained and knowledgeable in your industry, to assist you with any enquiry.
- We will be publishing the new phone number before May 2019.

Reduced labour rate

As you may be aware, we've increased our hourly rate over time from \$130 to \$150. However, as part of our pharmacy helpdesk launch, we will be reinstating our \$130 hourly remote helpdesk rate for our pharmacy customers

“

We appreciate that pharmacies do great things for the community, this is our way of saying thanks and giving back where we can!

AHLAM

”

THINKSUPPLY

We release **ThinkSupply specials** every month, you'll receive an email to your ThinkSupply user email so you can keep up to date!

Keep an eye out for this **ThinkSupply specials stamp**. Products with this icon have a permanent discount when purchased through ThinkSupply
